The Report of the Norfolk County Road System

To the Warden and Members of the County Council of the County of Norfolk.

Gentlemen: I beg leave to submit to you my Twenty-Fifth annual report on the Norfolk County Road System.

In the early days of the settlement of this County the road from Turkey Point to Brantford seems to have been one of the important thoroughfares. Then some roads were built for military purposes. One leading from Turkey Point across Charlotteville and Walsingham and Middleton in the direction of Tillsonburg, the Talbot Street crossing from the west part of the County towards Jarvis, and another leading from Port Dover towards Niagara. During this period certain roads were also opened under statute labor. The Hamilton and Port Dover Road was constructed as a plank road and completed in 1842, 100 years ago. I might mention that about ten years ago a contractor laying tile in this road frequently struck a four-inch plank road about 1'-6" to 2 feet below the level of the road bed. This road from Hamilton to Port Dover including the Caledonia Bridge was subsequently sold to a Toll Road Corporation for approximately \$85,000. From this time on there was a considerable number of Toll Roads in the County which gradually disappeared due to the Municipalities desiring to take charge of their own roads. For a number of years County Councils were responsible for County Boundary, but later were only responsible for bridges on County lines and on Boundaries between adjoining Municipalities, or on roads which were assumed as County Roads. Previous to the County Council adopting the County Road System in 1917, the roads in this County were kept up almost entirely by the Statute Labor System. Municipalities raising certain monies by taxation for special purpose. At the present time there are three systems: the King's Highways, which are constructed and maintained under the authority of the Provincial Government; the County system for which the County Council is responsible with the Province subsidizing the expenditure to the extent of 50 per cent.; and the Townships System under the control of the Township to which the Province contributes 50 per cent. of the cost.

The total mileage of Roads in the County is: 199 of which 60 miles are classed as King's Highways.

210 miles are County Roads.

929 are Township roads.

From 1920, when the first County Road was assumed by the Province as part of the Provincial System, until 1935, the County was required to pay 20 per cent. of the cost of Construction and Maintenance of these Highways. The approximate amount spent during this period on these Highways was \$2,902,800 to which this County contributed \$418,560.00. It must be remembered that in addition to this amount the County of Norfolk had already spent approximately \$350,000 on the County Roads assumed by the Province as Provincial Highways. On the County Road System assumed in 1917 and the various roads assumed since, together with the expenditure made on County Roads assumed by the Province, also on the roads which were reverted to the Townships in 1925, and including the payments made to the Urban Municipalities in the County, a total expenditure of \$4,198,395 has been made. The subsidies made by the Provincial Government has amounted to \$1,998,524, leaving a net payment by the County of \$2,199,871. In addition to the levy made for taxes for road purposes there was \$800,000 worth of debentures issued between 1917 and April 1933 for County Roads and Provincial Highways. There have been no debentures issued since 1933 and the outstanding debenture debt on Roads at the end of 1941 was \$101,950.

Since the adoption of the County Roads System in Norfolk County there have been 147 different members of this Council and of these, 50 have been members of the County Road Committee. Mr. Theodore Cunningham of Windham Township was the chairman of the first Committee appointed in 1917. Twenty-nine members served one year, 15 members served two years, 6 members served 3 years. Mr. P. D. Blayney was chairman of the Committee for 3 consecutive years and you, Mr. Warden, are the only member to have served 3 years as a member of the Road Committee and then become the Warden of the County.

The System as adopted in 1917 consisted of 240 miles. Various amendments were made in the succeeding years but in 1925 the County Road System was revised by the Department of Highways and the County of Norfolk was requested to pass a By-law in accordance with this revision. 60 miles of the original system was reverted to the Townships and 40 miles of new roads were added, making the system 200 miles. To this has been added 10 miles making a total at the present time of 210 miles.

While it is correct to say that the County has spent \$4,-198,395 on County Roads since 1917, it should be pointed out that this does not represent a true picture of the expenditure made on the present system. If you take into account the amount of \$350,000 expended on the roads assumed by the Province, approximately \$420,000 had been spent on the roads which were reverted to the Townships in 1925, and the amount of \$210,000 paid to the Urban Municipalities in the County, we find that there has been expended on the system of 210 miles an approximate figure of \$3,118,395.

Immediately after the approval of the original By-law the Committee on County Roads composed of the Reeves of seven Rural Municipalities, together with the Warden, Mr. Joseph Cridland, made an inspection tour of the system and they realized the magnitude of the proposition they had adopted. There was only 5 miles of road graded to Highway standard, this being the road from the Village of Courtland to the Town of Tillsonburg, built originally by the late E. D. Tillson and operated for a number of years as a toll road. It is true that on some of the roads there was some gravel but the large majority of the roads were dirt and the bridges to a great extent were in bad state of repair.

At the present time the Road System consists of .8 miles of Concrete road, 167.5 miles of black top road and 41.7 miles of gravel and stone roads. 54 reinforced concrete culverts, 26 reinforced concrete bridges, 9 steel bridges, 2 wooden bridges, approximately 3 miles of corrugated pipe culverts have been installed and about 15 miles of under-drainage with tile and perforated pipe.

During the year 1941 the programme as passed at the May Session of this Council was adhered to as nearly as possible. The chief features of the work were as follows:

Road 1—1.2 miles Tar D.S.T., cost \$1637.60. Cost per mile \$1365.

A Laminex wood culvert was installed. Cost \$1241.46.

Road 8—.35 miles Tar Mulch.

Road 10—4.4 miles Tar D.S.T. cost \$5708.12. Cost per mile \$1297.; .8 miles Soil Stabilization with Asphalt cost \$6,298.71. Cost per mile \$7873.39.

Road 11—.45 miles Tar Mulch; 3.4 miles Tar D.S.T., cost \$4928.14. Cost per mile \$1450.

Road 13—1500 yds. of gravel was applied at a cost of \$1,583.93.

Road 9—1733 yards of stone was applied at a cost of \$3,061.33; 5564' of 6" perforated pipe was installed at a cost of \$5686.42; 1300 tons of 2-inch gravel was used for backfilling the trenches and most of the dirt excavation was used for widening shoulders. The labor cost for this work was \$890.15. Five bad corners have been eliminated; 56.5 miles of Tar Re-treatment was completed at an average cost of \$546 per mile.

The most important project was the construction work done on Road 7. This involves the construction of a bridge and a heavy cut and fill of half a mile. Plans were drawn in the early part of the year for a Steel Bridge on concrete abutment but owing to conditions in the Steel Mills the Department would not consent to the construction of a Steel Bridge and requested that a reinforced concrete bridge be erected. In accordance with this, new plans were prepared and a contract for the work was let on September 18th to the Wainright Construction Ltd. with an understanding that the work should be commenced by October 1st but owing to difficulties in regard to the reinforcing steel it was not until October 7th that we were assured that the steel could be provided. The

bridge has been completed with the exception of the curbing and handrails. Approximately 35 per cent. of the cut and fill has been made. The expenditure up to December 31st was \$15,104.69.

In addition to the trucks purchased in 1940, 2 more 3-ton G.M.C. Trucks were purchased to be used in the County Road Work on a rental basis. Cost of Trucks \$3,880.00. Also purchased 1—Power Mower not on rental basis. Cost \$975.00. Mileage for trucks for 1941, purchased in 1940—55,947. Mileage for trucks purchased in 1941—30,961.

During the past few years considerable mileage of sod shoulders have been cut off and a number of ditches recleaned. These operations tend to increase the growth of weeds and spraying of weeds with Atlacide was resorted to. 70 miles of road was sprayed. While on some roads only sow thistle was sprayed, the total cost of this work was \$2,366.23 or approximately \$32.00 per mile.

During the last 13 years the County of Norfolk has built a considerable mileage of roads known as the Low Cost Surface Type. These naturally cost more to maintain than those of heavy construction. This may be due to several factors chief among which are the conditions of foundation and the amount of traffic using the roads. It is interesting to note that in Norfolk County in 1917 when the road system was adopted, there was a registration of 619 passenger cars and one truck. In 1940 the registration was 7,780 passenger cars and 1,006 commercial vehicles. This means tremendous increase in travel on the roads. During the last 2 or 3 years long Mulch Patches have been used in repairing the roads and in most instances the cause has been the breakdown of foundations. In view of this it seems necessary that several miles of mulch work should be done each year to reinforce the present surfaces and to get a sufficiently stable road so that in case the foundation gives out the traffic will not be impeded.

The following is a summary of the forms to be submitted to the Department of the year's work:

BY-LAW No. 784

A BY-LAW to amend the Schedules of Roads set out in By-law No. 554 and all subsequent By-laws comprising said Schedules.

WHEREAS for the purpose of attaining a greater efficiency and economy in County Road expenditures and of assuring more adequate maintenance of the various highways comprising the County Road System, it has been deemed expedient to make certain alterations in the System necessitating adjustment of mileage of roads included therein.

NOW THEREFORE the Council of the Corporation of the County of Norfolk enacts as follows:

1. That By-law No. 554 and all amending By-laws relating to the designated mileage of County Roads in the County of Norfolk be and are hereby amended to include in the County Road System of the County of Norfolk the roads set forth in the annexed Schedule and further described therein.

2. That this By-law shall not become operative until approved by the Lieutenant-Governor in Council under the provisions of the Highway Improvement Act.

3. That two certified copies of this By-law shall be submitted to the Minister of Public Highways within ten days of the passing thereof.

4. That By-law No. 782 is hereby repealed.

Dated at Simcoe this 21st day of January, 1942.
